

I agree in the elimination of the morse code requirement for hf privileges, I'M a 12 year lisencee and been trying to upgrade but can not copy morse code therefore can not upgrade. With my station ready for any emergency. Localy I can participated in net and drills above 50 mhz. but for practice and nets bolow 30mhz at state level I can not because my inability to copy the code efectively to be able to upgrade and This has been a obtacule for me and other fellow hams. futher more every time I show a younsters about radio and tell them about talking around the world they get excited, but I mention morse code and they loose interest imediatly. Therefore I agree in the elimination of the code require all together.
